MAY 30, 2026

— PROPOSAL

Toke Properties

A built-and-ready luxury and commercial real-estate website for Toke Ettehadieh — with live MLS, instant valuation, and a clear path to switch it on.

REPORT NO.

§ 01

Understanding

Toke Ettehadieh sells some of Houston's finest homes, yet her clients meet her brand through a generic portal — tokeproperties.com forwards straight to a HAR profile shared with every other agent.

This is a built website, not a pitch. It already exists as a working, password-protected demo: a cinematic, gold-on-black site engineered for the way high-end clients behave — they skim, they decide in seconds, and they act from their phones between meetings. Every screen in this document is live in that demo.

The brief was specific: win luxury listings first, give the growing commercial side its own front door, and lead with Toke rather than the brokerage. The site delivers all three, and it is wired to real estate data so the headline features work the moment the integrations are switched on.

Houston luxury residential and commercial

§ 03

The website, already built

A live, password-protected demo is ready to show today.

The site is a single, fast, mobile-first experience in Toke's gold-and-black brand. It leads with a valuation tool to capture sellers, routes buyers and investors through a Buy, Sell, Invest chooser, and presents Toke's credentials — the United Nations and Columbia background, the trilingual reach, the CENTURION award — as the reasons to trust her.

Two integrations are already wired through a secure server: live MLS listings and instant home valuations. In the demo they run on free sample data; connecting Toke's own accounts swaps in her real inventory and live figures with no rebuild. The pages that follow walk through every feature.

§ 04

View the live demo

WEB ADDRESS

blackhartconsulting.com/p/tokeproperties/main

PASSWORD

Toke\$11

§ 05

About the live demo

The demo is wired to live data so the headline features work today. The property collection runs on a free SimplyRETS demo feed – real MLS plumbing with sample Houston listings – which is replaced by Toke's own Century 21 / HAR inventory the moment she activates a SimplyRETS subscription.

The instant valuation runs on RentCast's free developer tier, which is capped at 50 lookups per month; activating a paid RentCast plan lifts that limit for everyday use. Until each subscription is active, the relevant feature falls back to clearly-labelled sample figures rather than failing.

§ 06

The homepage

HOMEPAGE

One value proposition, one primary action, and Toke's 4.98-star credentials. Full-bleed imagery and minimal text suit clients who skim rather than read.

§ 07

Buy, Sell, Invest

NAVIGATION

A single chooser routes residential buyers, sellers, and commercial investors down tailored paths. The seller route is given visual priority, in line with the listing-first brief.

Most agent sites bury intent behind a generic search bar. This one asks the only question that matters first — buy, sell, or invest — and routes each visitor down a path built for them. The seller path is given visual weight because winning listings is the priority; the invest path opens the commercial side Toke wants to grow.

It also does quiet work. A visitor self-identifies before filling in a single form, so by the time they reach out Toke already knows whether the conversation is a River Oaks listing, a first purchase, or a commercial play — and can prepare for it.

§ 08

Instant home valuation

— LIVE • RENTCAST

The screenshot displays the Toke Properties website interface. At the top, the navigation bar includes links for Listings, Sell, Invest, About, Reviews, and Contact, along with language options (EN, ES, FA), a phone number (713) 398-5009, and a Book a Call button. The main content area is titled 'What's your home worth today?' and describes a complimentary, private valuation service. It features a form for entering the property address (1820 River Oaks Blvd, Houston, TX) and property type (Luxury estate). Below the form is a 'Reveal my estimate' button. To the right, the results are shown: an estimated market value range of \$2,610,000 to \$2,890,000, an estimated monthly rent of \$12,500, and a gross yield of approximately 5.5%. A table lists three nearby comparable sales: 2 Longfellow Ln (\$2,695,000), 3120 Del Monte Dr (\$2,850,000), and 1714 Larchmont Rd (\$2,625,000). A 'Book a 15-min valuation call' button is also present.

ESTIMATED MARKET VALUE

\$2,610,000 — \$2,890,000

Est. monthly rent \$12,500 ~5.5% gross yield

BASED ON 3 NEARBY COMPARABLE SALES

2 Longfellow Ln	\$2,695,000
3120 Del Monte Dr	\$2,850,000
1714 Larchmont Rd	\$2,625,000

For 1820 River Oaks Blvd, Houston, TX Toke personally refines this with live comps & market timing.

Book a 15-min valuation call

A seller types an address and receives a value range, a monthly rent estimate, and three comparable sales — then books a call with Toke to refine it. Every enquiry is captured as a qualified seller lead. The figures shown are a representative result from the RentCast integration, which returns real comparables once connected.

This is the site's primary lead engine. A seller gets a credible number in seconds and a reason to book a call to refine it, and Toke gets a qualified, contactable lead with the property already identified. The figures are live from RentCast on the demo, so what Toke sees is exactly what a seller experiences.

§ 11

How Toke markets a listing

SELLERS

The screenshot displays the 'Why Sellers Choose Toke' section of the Toke Properties website. The header includes the Toke Properties logo, navigation links (Listings, Sell, Invest, About, Reviews, Contact), language options (EN, ES, FA), a phone number (713) 398-5009, and a 'Book a Call' button. The main heading is 'Marketing that makes buyers compete.' followed by a subtext: 'Your home is launched like a luxury brand — and marketed in three languages to Houston's most active local and international buyers.'

The section lists four key benefits:

- Cinematic media:** Architectural photography, film & aerial — the standard for Fine Homes & Estates.
- Global reach:** Exposed to qualified buyers worldwide through the Century 21 network across 80+ countries.
- Strategic pricing:** Data-driven positioning and staging guidance that protects your equity and your timeline.
- Expert negotiation:** A Real Estate Negotiation Expert (RENE) at the table for every counter and contingency.

On the right, there is a photo of a man and a woman reviewing a document. Overlaid on the photo is a statistics box:

- 80+ COUNTRIES REACHED
- 3 LANGUAGES MARKETING
- 4.98★ SELLER SATISFACTION

A section built to win listing appointments: cinematic media, the global Century 21 network, strategic pricing, and trilingual marketing to local and international buyers.

§ 12

Toke's story

— BRAND

Her United Nations and Columbia background, trilingual reach, and CENTURION award presented as trust signals. Century 21 sits underneath as the brokerage, with Toke's own brand leading.

Toke's background is her moat: a United Nations career, dual Columbia master's degrees, three languages, and a CENTURION award are not things a competitor can copy, so the site leads with them. For the international and relocating buyers who make up a growing share of Houston's luxury market, that profile is the difference between a cold enquiry and immediate confidence.

§ 13

The Private Collection

— LEAD CAPTURE

A gated list of off-market estates and commercial opportunities. Buyers request access by email — exclusivity that appeals to high-end clients and captures leads at the same time.

Exclusivity sells at the top of the market. By gating off-market estates and commercial opportunities behind a simple request, the site turns scarcity into a lead: a buyer hands over their details to see what the public cannot, and Toke gains a warm contact who has already signalled serious intent.

It also gives her a graceful way to market pocket listings and pre-market properties — the discreet inventory high-net-worth sellers expect — without posting them in public.

§ 14

Commercial investor tools

COMMERCIAL

A live cap-rate and net-operating-income calculator positions Toke as a numbers-first commercial adviser, not only a residential agent.

Investors speak in returns, not square footage. A live cap-rate and net-operating-income calculator on the page signals immediately that Toke is fluent in their language, and it keeps a serious prospect engaged on her site while they model a deal — then routes them to her to pressure-test the numbers against real Houston data.

§ 15

Reputation

— SOCIAL PROOF

Toke's 4.98-star, 740-review reputation carried onto the site as rotating testimonials — the single strongest reason a high-end client chooses one agent over another.

A 4.98-star average across 740-plus reviews is Toke's single most persuasive asset, so the site puts it to work rather than hiding it on a sub-page. Rotating testimonials keep the proof in view as a visitor scrolls — at the exact moment they are deciding whether to trust her with the largest transaction of their year.

Because the reviews are pulled from her verified HAR record, the proof grows on its own: every new five-star review strengthens the site without a line of work.

§ 16

Concierge contact

CONTACT

Call, text, WhatsApp, and email in one tap, with the office on a map and a short form. A line in Spanish and Farsi signals Toke's trilingual service.

High-end clients are time-poor and reach out on their own terms, so the site offers call, text, WhatsApp, and email in one tap, with the office on a map. The Spanish and Farsi line tells an international buyer they will be understood before they say a word.

§ 17

AI concierge

— AI CONCIERGE

The screenshot displays the Toke Properties Houston website. The header includes the company logo, navigation links (Listings, Sell, Invest, About, Reviews, Contact), and language options (EN, ES, FA) along with a phone number and a 'Book a Call' button. The main banner features a modern house at night with the text 'Sell for more, with less effort.' Below this, a testimonial from Toke Ettehadieh is shown. A chat window titled 'Toke's Concierge' is open, showing a conversation about selling a home. The chat interface includes a status indicator (Online), a greeting, a user input field, and a response from the AI concierge. At the bottom of the chat window are buttons for 'Sell my home', 'Book a call', 'See listings', and 'Commercial'. The website footer includes statistics: 4.98★ Client Rating, 740+ 5-Star Reviews, 15+ Years in Houston, and EN-ES-FA Spoken Fluently.

A round-the-clock assistant that answers questions, qualifies enquiries, and books showings — designed to reply in English, Spanish, or Farsi so an after-hours message is never missed.

§ 18

Trilingual by design

— TRILINGUAL

The site translates in place between English, Spanish, and Farsi — shown here in Spanish. It turns Toke's rarest advantage into a feature her competitors cannot copy.

§ 19

Built for the phone

— MOBILE

The full experience on a phone, with a fixed call, text, WhatsApp, and book bar — because high-end clients check listings between meetings, not at a desk.

§ 20

Recommended integrations & pricing

The headline features are wired and waiting.

Each integration below is optional and billed directly by its vendor — Toke chooses which to switch on and at which tier, and the build connects whatever she selects. The five that follow each take their own page, with a full pricing-tier table and the tier recommended for a single luxury agent, with the reasoning.

§ 21

Live MLS listings

SimplyRETS

WHAT IT IS

A modern API that pipes the Houston MLS feed
Toke already qualifies for as a HAR member onto
her own website, in clean, structured form.

WHAT IT DOES FOR TOKE

Her full live inventory — residential and commercial
— sits on her own branded site with search,
instead of sending clients to a portal full of other
agents. New-listing and price-drop alerts keep
buyers engaged automatically.

BASIC

\$49 / mo

Active and pending listings

RECOMMENDED

PREMIUM

\$99 / mo

Adds sold and closed
comparables

ENTERPRISE

\$199 / mo

Higher request volume

WHAT IT UNLOCKS FOR TOKE

- Her complete MLS inventory, searchable on her own domain instead of a third-party portal.
- Automatic new-listing and price-drop alerts that pull buyers back without manual follow-up.
- Sold and closed data that feeds the valuation tool's comparables and a recently-sold track record.
- One feed that powers residential and commercial search from the same place.

One-time \$99 connection fee; requires Toke's HAR / MLS authorisation. The live demo runs on the free SimplyRETS demo feed.

RECOMMENDED TIER Premium. The sold and closed data it adds is exactly what powers the valuation tool's comparables and a recently-sold track record — Basic omits it. Enterprise only raises request limits a single-agent site will never reach.

§ 22

Instant home valuation

RentCast

WHAT IT IS

A property-data and automated-valuation (AVM) API covering 140 million homes. One address returns an estimated value range, a rent estimate, and recent comparable sales.

WHAT IT DOES FOR TOKE

Turns the What's-your-home-worth tool from a drawing into a real seller-lead engine: an instant figure on her site, captured as a qualified lead, then refined personally by Toke on a booked call.

DEVELOPER

\$0

50 lookups / month

RECOMMENDED

FOUNDATION

\$74 / mo

1,000 lookups / month

GROWTH

\$199 / mo

5,000 lookups / month

SCALE

\$449 / mo

25,000 lookups / month

WHAT IT UNLOCKS FOR TOKE

- An instant, credible home value that turns an anonymous visitor into a named seller lead.
- A rent estimate and gross yield that make the tool useful to investors as well as sellers.
- Comparable sales pulled automatically, so each estimate looks researched rather than guessed.
- Market and rent data Toke can reuse in listing pitches and seller reports.

Each valuation uses roughly two API calls (value plus rent). The live demo runs on the free Developer tier — 50 lookups per month.

RECOMMENDED TIER Foundation. 1,000 lookups a month is far more than a single agent's site traffic will use, at a fraction of Growth's cost. The free Developer tier powers the demo, but its 50 lookups run out in a busy week. Move up to Growth only once monthly valuations pass roughly 500.

§ 23

24/7 trilingual concierge

AI Concierge — Anthropic Claude + Twilio

WHAT IT IS

A pair of services: Anthropic's Claude answers questions, qualifies intent and budget, and books appointments in English, Spanish, or Farsi; Twilio carries those conversations over WhatsApp and SMS.

WHAT IT DOES FOR TOKE

Scales Toke's single biggest edge — being trilingual — to round-the-clock. A buyer from Tehran or Mexico City who messages at midnight is answered fluently, qualified, and on her calendar by morning.

RECOMMENDED

LIGHT

~\$30 / mo

A few hundred conversations; pay-as-you-go

STANDARD

~\$60 / mo

Higher volume across WhatsApp and SMS

HEAVY

~\$120 / mo

Sustained high message volume

WHAT IT UNLOCKS FOR TOKE

- Round-the-clock first responses, so an after-hours enquiry never goes cold.
- Replies in English, Spanish, or Farsi — Toke's trilingual reach, automated.
- Lead qualification and showing-booking handled before a conversation reaches her.
- WhatsApp and SMS coverage, the channels international clients actually use.

Usage-based; no platform fee. WhatsApp needs a one-time Business verification.

RECOMMENDED TIER Light. The cost scales automatically with use, so there is nothing to over-buy: Toke pays only for the conversations the site generates, which at launch sits in the Light band and rises on its own as demand grows — no plan change required.

§ 24

Houston flood & climate risk

First Street

WHAT IT IS

The gold-standard climate-risk model — it powers the flood, fire, and heat scores on Realtor.com and Redfin. Its API returns a property-level flood, wind, heat, and fire score, including future climate-adjusted risk.

RECOMMENDED

FEMA LAYER

\$0

Official FEMA flood zone per address

WHAT IT DOES FOR TOKE

Answers the question on every Houston buyer's mind after Harvey — will this flood — proactively, on every listing. No other Houston agent's site does this; it makes Toke the trusted local authority.

FIRST STREET API

Custom quote

Flood, fire, heat and wind, with future-adjusted risk

WHAT IT UNLOCKS FOR TOKE

- A clear answer to the question every Houston buyer asks — will this flood — on every listing.
- Forward-looking flood, wind, heat, and fire risk, not only today's FEMA zone.
- A point of authority no competing Houston agent's site currently offers.
- A free FEMA starting point, with room to upgrade once the feature proves its pull.

FEMA's National Flood Hazard Layer is a free public API; First Street is a paid annual data licence, priced on request.

RECOMMENDED TIER Start with FEMA, at no cost. It ships the flood-zone answer Houston buyers want immediately. First Street's richer, forward-looking model is worth adding once the feature has proven its pull — its data is the gold standard, but its pricing is bespoke and worth committing to only when the demand is clear.

§ 25

AI virtual staging

ReimagineHome

WHAT IT IS

AI that instantly stages empty rooms, removes clutter, restyles interiors, and fixes landscaping in listing photos — photoreal, in seconds, for a few dollars an image instead of hundreds for physical staging.

WHAT IT DOES FOR TOKE

Two wins: vacant or dated luxury homes show beautifully, which sells them faster and higher; and in a listing appointment Toke can transform a tired room on the spot, which wins the listing.

ESSENTIAL

\$14 / mo

30 image credits

RECOMMENDED

PRO

\$59 / mo

200 credits +
conversational design

ADVANCED

\$79 / mo

400 image credits

AGENCY

\$99 / mo

900 image credits

WHAT IT UNLOCKS FOR TOKE

- Vacant or dated luxury rooms shown beautifully staged, in seconds, for a few dollars each.
- A listing-appointment weapon: restyle a tired room on the spot to win the listing.
- Faster sales and stronger offers from photography that makes buyers picture the life.
- Decluttering, restyling, and landscaping fixes with no photographer re-shoot.

One credit per generated image.

RECOMMENDED TIER Pro. 200 staged images a month covers a luxury listing load with room to spare, and it unlocks the conversational design flow Essential lacks. Advanced and Agency only add credit volume a solo luxury agent will rarely exhaust.

§ 26

What the build includes

IN SCOPE

- The complete website shown above, in Toke's brand, responsive across phone, tablet, and desktop.
- A secure server that holds the API keys and connects the live integrations Toke selects.
- Wiring of the two integrations already built — live MLS listings and instant valuation — to Toke's own accounts.
- Swapping demo content for Toke's logo, professional photography, and live MLS inventory.
- Search-engine fundamentals, fast load times, and a tasteful set of motion and interaction.

OUT OF SCOPE

- The monthly subscription fees for any third-party API; these are billed directly to Toke by each vendor.
- Professional photography, videography, or copywriting beyond the demo placeholders.
- Paid advertising, social-media management, or CRM administration.
- Toke's MLS membership and the authorisation required to publish her live HAR feed.

§ 27

Path to launch

STEP 1	Choose integrations	Toke selects the APIs and tiers from the section above.
STEP 2	Connect accounts	Vendor keys and MLS authorisation provisioned and added to the secure server.
STEP 3	Brand and content	Logo, headshot, and live MLS inventory replace the demo placeholders.
STEP 4	Go live	Site pointed at Toke's domain; final review and launch.

§ 28

Assumptions

- 01 Toke selects which integrations to enable and at which tier; the recommended tiers above are the default.
 - 02 Third-party API subscriptions are opened in Toke's name and billed directly to her by each vendor.
 - 03 Toke provides her logo, professional headshots, and authorisation to publish her live HAR / MLS feed.
 - 04 Access to the tokeproperties.com domain is granted so the site can be pointed to it at launch.
-

§ 29

Investment

Black Hart Consulting is building this site for Toke at no charge.

The design and build are complimentary, in exchange for permission to feature the finished site as a case study in Black Hart Consulting's portfolio. There is no project fee, deposit, or retainer.

The only ongoing costs are the optional third-party integrations Toke chooses to switch on, billed directly to her by each vendor at the tiers above. A typical starting set runs to roughly \$260 to \$290 per month; she can launch with fewer and add the rest later.

§ 30

Acceptance

Signing below confirms Toke Properties would like to proceed — to connect the selected integrations, replace the demo content with live data, and launch the site — and grants Black Hart Consulting permission to feature the finished work as a portfolio case study.

Toke Ettehadieh

Director, Toke Properties
